EXPERIENCE

Hinge Health · Software Engineer

May 2023 – Present · Remote

- Architected and delivered a cross-domain event-driven system (Kafka) synchronizing real-time data across [N] microservices — authored the RFC, led implementation, and owned production rollout.
- Led full-stack integration of computer vision features (pose recognition & pain assessment) into the React Native app, partnering with ML scientists to ship model outputs as production-ready mobile features.
- Designed and shipped a full-stack UX feature that increased user engagement by 30%; built CI/CD pipelines (GitHub Actions + TypeScript) that improved team delivery throughput ~6x.
- Built internal developer tooling: an AI-powered bot (Claude API) automating PR creation and bug triage, plus backend and frontend observability dashboards tracking service latency and UI rendering across device models.
- Authored [N+] technical design docs and RFCs; mentored [N] junior engineers; served as on-call engineer owning incident response and post-mortems for production services.

Arctic Wolf · Software Developer Co-op

Sep 2022 – Dec 2022 · Remote

- Designed and implemented data ingestion and parsing logic for the cybersecurity knowledge base product.
- Integrated AWS DocumentDB into the Python backend ecosystem; provisioned scalable infrastructure with AWS CloudFormation (IaC).
- Proactively organized product demos and knowledge-transfer sessions, bridging communication across teams with minimal direction.

Enlighted Inc. · IoT Software Developer Co-op

Jan 2022 – Apr 2022 · Remote

- Built a gateway/sensor network simulator for packet transmission testing; deployed at scale with Docker + Kubernetes on GKE, achieving 90% cloud resource utilization.
- Strengthened IoT security by implementing 802.1x authentication from firmware level (wpa-suplicant) through UI and REST API; enforced API role restrictions with JAX-RS and Spring MVC.
- Diagnosed and resolved DHCP-level firmware instability at service reboot through packet analysis with Wireshark.

Martello Technology · Software Developer Co-op

Jan 2021 – Apr 2021 · Remote

- Delivered user-facing features for a network monitoring SaaS using Java Spring + Nginx backend and JavaScript (Node.js, jQuery) frontend.
- Automated backend tests with JUnit/Mockito; managed PostgreSQL schemas and server-database communication with JDBC and Hibernate.

Cerence Inc. · Software Tester Co-op

Aug 2019 – Dec 2019 · Montreal, QC

- Automated test cases in Python for an embedded voice recognition system; built reusable test-data tooling that improved team preparation efficiency.
- Executed regression, latency, stress, and exploratory testing across release cycles; collaborated on test plans and defect resolution.

SKILLS

Mobile & Frontend	React Native, TypeScript, JavaScript, Swift, SwiftUI
Backend	Java Spring Boot, Python (Flask), C# .NET, Node.js, GraphQL, Kafka
Infrastructure	Docker, Kubernetes, GCP (GKE), AWS, GitHub Actions, GitLab CI/CD
Data	MongoDB, PostgreSQL, MySQL
AI & ML	Computer Vision integration, LLM (Claude API), Gemini API
Testing	Jest, JUnit/Mockito, Selenium, Python Unittest
Languages	TypeScript, JavaScript, Python, Java, C#, C/C++, Bash

PROJECTS

Vibe Forecast (2024–2025)

- AI-powered mobile app delivering personalized tarot, astrology, Yi-Jing, and BaZi readings; available on TestFlight, preparing for App Store release.
- Stack: React Native, TypeScript, Gemini API, Cloudflare.

NeAR Me (2023)

- AR mobile app with interest-based geotagged location markers backed by a KNN recommendation system.
- Stack: Unity, C# .NET (mobile), Java Spring Boot + Python Flask (backend), MongoDB Atlas, GKE.

MorphX (2024)

- First-person 3D escape room PC game featuring dynamic puzzle mechanics and immersive environments.
- Stack: Unreal Engine, C#, .NET, MySQL.

EDUCATION

University of Waterloo · Bachelor of Computer Engineering	May 2023
• Specialization in Management Science and Artificial Intelligence	

CERTIFICATIONS

- 2024 – Certified Information Technology Specialist (CIPT)
- 2023 – Certified Kubernetes Application Developer (CKAD)
- 2022 – AWS Certified Cloud Practitioner
